

Teacher Script for Student Perception Surveys

Teachers may use and/or edit this script to prepare their students to take surveys

Each of you will be completing a survey to share your thoughts about this class and my teaching. The survey is anonymous, which means the survey will not ask for your name and I will not know which survey response is yours, but I will see general results and responses as a whole class.

The purpose of this survey is to gather your perceptions about this class and help me improve my teaching and better support you as students. It is important that you take time to think about your answers and be honest in your responses.

You will use computers or devices to take the survey. You will be asked to answer on a scale from “strongly disagree” to “strongly agree”. If you don’t have an opinion or don’t understand the statement, you may answer “neither agree nor disagree”. Please mark one answer for each question.

Remember, this survey is about this class. Any questions?

Thank you for helping me become a better teacher!
